Mechanical counter unit Screw M3x6 Remove the upper delivery assembly. Endorser cover, imprinter cover, and upper unit are open. Cant communicate with CPU for imprinter. Cant communicate with CPU for ultrasonic double feed detection. Check the operation of the pickup sensor. Check the connection of the motors and gears. Each time Count Only is pressed, the data changes. These Bulletins should be read carefully. After you finish reading this manual, store it in a safe place for future reference. These limits are designed to provide reasonable protection against harmful interference in a residential installation. However, Canon Electronics Inc. Please read this manual thoroughly before operating the machine in order to familiarize yourself with its capabilities, and to make the most of its many functions. After reading this manual, store it in a safe place for future reference. The scanner may tip or fall over, and cause an injury. Do not plug the scanner into an outlet shared with another device. If you use an extension cable, pay attention to the total amperage of the cable. Make sure that you have everything. Check every item you have removed from the box. If any items are missing, contact your sales representative. Connectors Air Vent To avoid overheating and causing a fire, never block the air vents on the rear of the scanner. Use the method that is compatible with your computer system. I Do not turn OFF the scanner or remove any interface cables when an application is running. CAUTION I Do not connect both SCSI and USB interface cables at the same time. Connect your computer to the scanner using the SCSI cable. Do not select 7 Important as this is normally assigned to the SCSI controller. If a SCSI hard disk is

mounted, do not use 0 and 1. CAUTION SCSI Connectors USB Connector cannot be connected USB Interface Cable Connecting the Power Cord Connect the power cord.<http://challendor.com/fckeditor/upload/dazon-150-repair-manual.xml>

Preparing the Document Tray Extension Pull out the document tray extension to accommodate the size of the document to be scanned. N Long Documents If the document you are scanning is long, open the document eject tray extension and adjust the position of the stopper as needed. Lift up the stopper. Adjust the position of the stopper to match the length of the document. G The displayed device name of the DR6080 or DR9080C differs depending on the connection, via SCSI or via USB. Turn OFF the power to the scanner and the computer before changing the connections, and then turn ON the power and let the computer recognize the scanner again. To turn OFF the scanner, press the power switch. I Wait at least 10 seconds before turning ON the scanner again. I For your safety, disconnect the power plug from the power outlet if you are not CAUTION using the scanner for a long time. Be sure to open and read the Readme.txt file on the setup disc before installing the software. G If another ISIS compatible driver is already installed on the computer, be sure to make a backup of the following file. The installation starts. Follow the instructions on the screen to complete the installation. Installing CapturePerfect Connect the scanner to the computer. Turn ON your computer and start Windows. Be sure to log on as an administrator if your system is Windows NT 4.0 Workstation, Important Windows 2000 Professional, or Windows XP. The installation starts. Follow the instructions on the screen to complete the installation. G Be sure to log on as an administrator if your system is Windows NT 4.0 Workstation, Windows 2000 Professional, or Windows XP. Important G The dialogs and button names in Windows XP are different from those used in the explanations in this manual. If you selected "CapturePerfect 2.0," the above dialog box appears. Treat the documents carefully. The paper edges may cut your fingers. The ranges of width and length for a document are Width 55 to 305 mm.

Align a batch of documents to be scanned until the edges are even. Place the document face up in the document tray, aligning the documents top edge against the back of the document tray. When scanning ends, the document tray is lowered. If paper feed stops during scanning due to a system error or paper jam, make sure that the last page of the document was recorded properly before continuing to scan. Note N PanelFeeding To use the panelfeeding mode, instruct the scanner to start from the application. Instruct scanning to start from the application. The Start key changes color from red to green. The document tray rises, and scanning begins. When scanning ends, the document tray is lowered. The document tray rises, and scanning begins. When scanning ends, the document tray is lowered. I If the scanning mode is set to "Automatic Feeding,". Place the first page of the document face up in the document tray, aligning the document's top edge against the back of the document tray. Be careful not to pinch your fingers in the document tray. CAUTION Instruct scanning to start from in the application. Place the next page of the document face up in the document tray, aligning the document's top edge against the back of the document tray. Count Only key The Count Only key lights to indicate the Count Only mode. The result varies depending on the pattern. G PATCH T FILE A When this sheet is recognized, the document following the sheet is saved to a separate file. Place the patch code sheet on top of the documents that are to be saved to a separate file. Double Feed Detection Function The scanner automatically detects two pages that have been fed at the same time double feed and displays an error code that means "Double feed detection". G Operation panel buzzer setting U010 Do not sound buzzer during key operation. U011 Sound buzzer during key operation default. G Count Only mode setting U020 Do not use the endorser in the Count Only mode default.

U101 Long Document mode Length of document is 1,000 mm or less. When using the Long Document mode, if you place a long document askew in the document tray, it will rub against both sides of the feeding path and may damage the Note document. Remedy the problem by following the

procedure for the respective cause. SCSI Connections Cause The scanner is not correctly connected. Remedy Connect the SCSI cables to the scanner in the correct way. Remedy Check the SCSI ID of all connected SCSI devices, and make sure that the same SCSI ID is not set to two or more devices. Reset the SCSI IDs if the same SCSI ID is set. Remedy Connect the scanner correctly with a cable that supports USB 2.0. Cause The USB 2.0 interface card is not correctly installed to the computer. Remedy Refer to the USB 2.0 interface card operation manual and install it correctly. I Be careful when you clear a paper jam. You may be injured unexpectedly. For example, the paper edges may cut your fingers, or the document may be damaged. Remove the jammed paper from inside the scanner. Do not force the upper scanner down. Doing so might damage the scanner. Press the upper scanner down firmly on both sides to close it. If you press the upper scanner down only on one side, the opposite side will not be fully closed. Close the document eject tray extension if it is open. Lift up the upper scanner slightly. Press the upper scanner down firmly on both sides to close it. If you press the upper scanner down only on one side, the opposite side will not be fully closed. Make sure that you hear it click into place. Condition Paper jam has occurred. Cause and remedy This is because ink is sticking to the holes on the guide plate inside of the imprinter. Clean these holes with a cotton wool swab. Check the following and take the appropriate action. The following describes error codes that appear on the counter display and how to remedy the error. Remedy Close the imprinter cover and endorser ED600 cover.

Error code Cause The upper scanner, imprinter cover, and endorser ED600 cover are open with the optional imprinter and endorser ED600 installed. Remedy Open the upper scanner and remove the document. Check to see if the document was scanned correctly, and scan the document again. Error code Cause Staple detected, document feed stopped. Error code Cause Number of document sheets to be scanned exceeds set number of sheets in the verify scan. I Before you clean the scanner, turn OFF the scanner and computer and disconnect the power cord from the power outlet. Otherwise, it might cause an electrical shock. CAUTION I Never clean the scanner with any kind of organic solvent, such as alcohol, benzene, or paint thinner. Clean the sensor periodically so that dust and debris do not collect on it. Sensor Cleaning the Scanning Glasses and Rollers A probable cause of stripes appearing on scanned images or dirt appearing on scanned documents is dirt on the scanning glasses or rollers. Be sure to clean both scanning glasses, the one below and one above. Never spray mild detergent or water directly on the scanning glasses. The spray could penetrate below the glass and contaminate the internal light source and CAUTION lenses. Rollers are located at the positions indicated in the figure below. Pickup Rollers Feed Rollers Feeding Rollers Platen Rollers Retard Rollers Remove the pickup roller, retard roller, and feed roller. See "Installing and Removing the Rollers,". Press the upper scanner down firmly on both sides to close it. If you press the upper scanner down only on one side, the opposite side will not be fully closed. If this happens, clean the shading plates. The power to the scanner is ON when you are cleaning the shading plates so be very careful. The shading plates retract. Carefully close the upper scanner. If you press the upper scanner down only on one side, the opposite side will not be fully closed.

Clean off the ink with water and a mild detergent on a soft cloth that has been firmly wrung, and then thoroughly dry it with a dry cloth. The feed rollers need to be changed periodically to maintain scanning quality. When to Replace the Rollers If the total number of scanned documents exceeds 250,000, a message for roller replacement appears when you restart the computer. G The displayed dialog box differs depending on which Windows operating system Note you are using. I Turn OFF the power to the scanner and unplug the power cord from the power outlet when you remove or install the rollers. Open the roller cover. Open the roller holder and remove the pickup rollers. Position the square axle of the pickup roller on the left and insert the new pickup rollers. Firmly close the roller cover until you hear it click. If the roller holder and roller cover are not firmly closed it will cause a feed error. Always be sure to check that the roller holder and roller cover are closed. Open the roller cover. Pull the lever that locks the feed rollers in place towards you. Slide the feed

rollers to the right, and then pull them towards you. Place the new feed rollers on the pin. Set the feed rollers in place q, and align the notch in the roller's axle with the shaft on the scanner w. Firmly close the roller cover until you hear it click. If the roller cover is not firmly closed it will cause a feed error. Always be sure to check that the roller cover is closed. Press the hook upwards and remove the roller cover. Lift the roller clamp lever q and slide it to the left w. Set the new retard rollers in place, and align the notch in the roller's axle with the shaft on the scanner. Slide the roller clamp lever to the right, and push it into the hole in the retard rollers. Put back the roller cover. Be sure that the hook is completely latched and the roller cover is not loose.

If the roller cover is loose, the document tray will catch on it causing the scanner to CAUTION not operate correctly. Remove these screws x6. Press here for open the imprinter cover. Remove this screw. Remove these screws x6. Retaining ring.
