Christopher Roe 5.0 out of 5 stars However, its a very compact, lightweight, and rugged printer that fits nicely in my backpack, and can print on fullsized 8.5x11 paper. Buying from Amazon during a sale netted me a very decent savings off MSRP. Photo quality on photo paper is very, very good. Text quality on normal inkjet paper is not perfect, but is more than adequate for most purposes, and is comparable to that of my larger Canon Pixma iP6600D.

If you buy it to use with a notebook on the go, get the LK51B battery. With the battery, I was able to shoot digital photos for damage reporting, download them to my notebook, and then print them off on 4x6 photo paper at a lease signing in a house with no electricity. Very convenient!My wife saw it when a person measuring our windows for shutters came and printed out an estimate. She is an

artist and has workshops at various hotels around the country. We used to lug an old Epson around, but it was bulky and printed pages at a snails pace. She like the Canons size and I have to say it is portable, prints pages at a decent rate and can make nice color pictures. Set up was easy on our laptop. I really like the small size of the printer. If you buy it, it doesnt come with a USB cable, so make sure you have one. Bottom line, if you need a small portable printer that can handle regular paper and pictures buy this one.It doesnt seem to add much weight to the bag either. Set up and use is a breeze. Print quality is not on the level of a laser printer but it is very good for its size. The printer ink cartridges are tiny but I guess I shouldnt have been surprised. The printer is also fairly rugged. It has bounced around in my computer bag for the past month with no problems. All things considered, this was a great purchase and it has served very well as a portable printer. I would definitely recommend it.Id been wanting a printer that could fit in my laptop bag along with the computer and associated cables and peripherals. This one fits the bill. Its quite compact and produces perfectly satisfactory prints. Ive made a couple of photo prints which are surprisingly good, but I use it principally for text. I dont know yet how economical it will be cost of ink cartridges, but there simply arent many portable printers that will produce full letter size prints as this one does. Im very satisfied with the iP90v.

We have mobile reps that travel around to customer sites with a laptop and printer. These printers have a very small footprint and the cartridges are reasonably priced. To top it off, the price is great. I purchased mine from Adorama through Amazon. They have been a very good vendor.It prints the pages so nice and clean. And it doesnt have any problem with the chords. I had another printer and the cord never quite fit and it would disconnect in the middle of the prints. This one so much better efficient and the ink is really cheap.My older PIXMA ip4200 would not print correctly with VISTA. My husband looked for updated downloads at Canon, but he could not find that model in the list provided. This printer works just fine. The color is good and the ink refills are not very expensive.The HP 400 series were too bulky for my backpack. Pros Size is great. The picture quality is great. Easy to install. The battery lasts long, even thought you must purchase it separately. Cons Very slow to print. I personally had no problem with the speed of print, but it is slower than most other printers.Page 1 of 1 Start over Page 1 of 1 In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading.
