A Product covered by this limited warranty will be repaired or exchanged, as determined by Canon USA, and returned without charge by the ASF. If the problem cannot be corrected over the telephone, and you elect the InstantExchange option, a reference number will be issued to you. You will be asked for the Product serial number and other information pertaining to your Product and for a ship to location for the replacement Product must include street address. After receipt of the replacement Product with instructions and a prepaid waybill, follow the enclosed instructions on how to ship your product to the Canon USA repair facility. Your Product must be returned in the shipping carton in which the replacement Product was packed and include the reference number, A COPY OF YOUR DATED PROOF OF PURCHASE BILL OF SALE, and a complete explanation of the problem. Canon USA does not guarantee same day shipment in the event of the occurrence of factors beyond its reasonable control. The replacement Product you receive may be a refurbished or reconditioned unit and will be covered for the balance of the period remaining on your original limited warranty. Setting Up for Use over Wired LAN A This machine B Hub or router C Computer A B C When the machine has not been connected to the network, perform this setup to use the machine over wired LAN. This setup procedure requires settings to be performed on the machine. If the installation and adjustment of the machine have not been finished, refer to your setup sheet to set up the machine properly. Turn off the firewall function temporarily or change its setting. If you disable the firewall function, disconnect your network from the Internet. For information on the firewall function of your security software, refer to its instruction manual or contact its manufacturer. Click Cancel to quit the screen. In Windows Vista, the screen may close automatically when the USB cable is unplugged. Then turn off the machine and proceed from step 3 to install the software. 1 Turn off the machine. Note Confirm that all the lamps on the Operation Panel have gone out. 2 Turn the machine on. If the same screen reappears in subsequent steps, click Continue. This screen will not appear in Windows XP and Windows 2000. Note If the Select Language screen appears, select a language, then click Next. If the Select Your Place of Residence screen appears, select your place of residence, then click Next. 6 Installation of the MP Drivers, Onscreen Manuals, and application software will begin. The software installation screen may appear during the installation process.

Read the contents on the screen and follow the onscreen instructions to install the software. 9 When the Setup Method screen appears, confirm the connection type. The next procedure varies depending on how you intend to connect the machine and the computer. When you connect, see "1 Preparing for Setup" on page 2 and "2 Installing the Software" on page 3 to confirm that the

software installation is complete, then proceed with the procedure below. 1 On the Setup Method screen, select Set up the printer and thThe machine connected with the USB cable is detected automatically via LAN connection. In Windows Vista, go to step 6. In Windows XP and Windows 2000, go to step 5. I Note If the machine was noThis screen will not appear in Windows Vista. Note The Card Slot of the machine must be mounted to be used as the memory card drive of the LAN connected computer. If the setting is set to USB enabled, you cannot access the network drive of the Card Slot. If "Communication withNote It is required to connect to the Internet to register your product. Turn on the firewall function before connecting your network to the Internet. To register later, click Cancel and go to step 9. After software installation is complete, doubleclick on the desktop. If a message asking for your confirmation to restart your computer appears, follow the onscreen instructions to restart your computer. The User Registration scIf only one CDROM is included in the package for the Windows setup Click Exit. The Setup CDROM will be ejected. If it is not ejected automatically, remove it manually. If Restart is displayed, make sure that the Restart the system now recommended check box is selected, then click Restart. After the computer restarts, remove the Setup CDROM. Note Keep the CDROM in a safe place in case you need to reinstall the software.

If twSee "1 Preparing for Setup" on page 2 and "2 Installing the Software" on page 3 to confirm that the software installation is complete, then proceed with the procedure below. 1 Make sure that the machine is connected to the network device with a LAN cable, then turn on the machine. In Windows Vista, go to step 5. In Windows XP and Windows 2000, go to step 4. Note If the machine has not been detected, make sure of the following, then click Update. The machine is turned on and connected to the network device with the LAN cable. The machine is not set to use access control MAC address filtering. The firewall function of any security software is turned off. Some programs that switch the network envThe network connection between the machine and the computer is now successfully established. 6 When the Setup Complete screen appears, click Next.Note If you have already registered your product, click Cancel. It is required to connect to the Internet to register your product. To register later, click Cancel and go to step 8. After software installation is complete, doubleclick on the desktop. If a message asking for your confirmation to restart your computer appears, follow the onscreen insIf only one CDROM is included in the package for the Windows setup Click Exit. Note Keep the CDROM in a safe place in case you need to reinstall the software. If two The following two connection types are described in this manual. This setup procedure requires settings to be performed on the If the installation and adjustment of the machine have not been finished, refer to your setup sheet to set up the machine properly. For information on the firewall function of your security software, refer to its instruction manual or contact its Start from step 2. 1 Connect the machine and the computer with A a USB cable. A USB port 2 Turn on your Mac. Note Make sure that the machine is turned on. 3 Insert the Setup CDROM.

If the CDROM folder does not open automatically, doubleclick the CDROM icon on the desktop. Important If two CDROMs are included in the package for the Windows setup.
