With no warmup time required, the Canon PC170 can begin copying immediately at speeds of up to four copiesperminute cpm for lettersize paper and comes equipped with a 50sheet stack tray that accepts postcard to lettersize paper. The Canon PC170 offers virtually maintenancefree operation with Canons exclusive Single Cartridge System, containing the drum, development unit and toner, for performance that requires littletono maintenance at just penniespercopy. The Canon PC170 personal copier also offers tremendous versatility, copying onto a variety of papers, including stationary, postcards, colored paper, transparencies and labels. Copy quality is exceptional with a choice of automatic or manual exposure and automatic shutoff. These energysaving attributes enable the Canon PC170 to meet the Energy Star guidelines set by the U.S. Environmental Protection Agency EPA and the U.S. Department of Energy. The EPA established the International ENERGY STAR Program in 1992 to help prevent global warming by promoting the development and use of energyefficient products. Whats in the Box Canon PC170, 50sheet tray, power cord, user manual.To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. E IN MARYLAND 5.0 out of 5 stars Ran a few errands on the way back stopped at the Post Office, had the correct change but found out the copier was out of paper, the line of customer was lengthy so someone loading paper in the copier would take time I did not have. Portable, easy to use and store, I now can make copies whenever the need arises in the comfort of my home. The copier was

delivered in perfect condition. The copier was carefully remove from the box with the box being saved. The laser cartridge tape was pulled to open the cartridge and inserted.http://xn--d1annh.xn--p1ai/files/jobs-for-manual-testing.xml

The instructions were followed with the paper tray and copier tray unfolded. The copier was plugged in and a perfect copy was made of the instructions using multi purpose paper. No complicated instructions, this copier meets all requirements, saving me time, no more having to wait in line just to make a copy,Its met my every expectation. The best is that its instant on. Its saved me loads of time doing tiny copy jobs at my nearby FedEx Office. I have a lot of those little copy jobs.and its work the extra convenience to have the copier at home. I never travel with it so its led an easy life. Im careful not to press too hard when copying from a paperback book.I treat it gently, and its responded with perfect performance.As noted elsewhere its best for light copy use. The true cost of the device is the cost of E20 cartridge 2000 pages PLUS the device cost. I would be surprised if it were that high.The PC420 started pulling the paper in slightly askew a year ago, and stopped pulling it in this week. How many people need to stack these. Dont buy the replacement cartridges at full retail. My PC170 also arrived in 2 days with free ground shipping!Takes up little room in a home office and saves countless trips to the nearest copy store. This is the second one of these Canon Personal Copiers that I have had. The first one lasted well over 20 years with a repair after about the first 10 a new roller and a good cleaning. It finally snapped a small plastic part in the machinery that pulls in the sheep of paper after another 13 years. I couldnt find a replacement part, so I bought the new one two years ago. I am keeping the old one in the closet in case I ever get a chance to replace that one little plastic part. I was going to buy another one for a separate location, but cant find one any more. I hope they have not stopped making them.Highly recommend. I liked it so much I bought one for home use about a year ago.

After one month, there was a problem with spotting all over the copies. It was too late to return it to Amazon for an exchange. Luckily, I have a friend who used to repair Xerox machines and he took a look at it and was able to correct the problem. Now it works perfectly again. Saved me the trouble of taking it to a service center. There are just about no features on this machine, but its so much easier and faster than scanning a document into your computer and then printing it out. I am very pleased with this copier and highly recommend it. Im only giving it 4 stars because of the spotting problem I had in the beginning.In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. After performing this test, if the resulting copy does not improve in quality then replace the cartridge with a new one. Approximate copy yield. Canon E20 Cartridge approx. 2,000 copies of an A4size, standard original. Replacing Cartridges. Before removing the cartridge be sure to turn the power switch OFF. Grasp the grip and pull the sealing tape out in the direction of the arrow mark away from the cartridge. Hold the cartridge so that the side with the written instructions is facing to the left.

When packing the cartridge, insert it in the bag so that the side with the written instructions is facing upwards. Then place the cartridge into its box. Cartridge Handling Precautions. Return the platen to the center position. Cartridge Storing Precautions. Becoming a part of this worthwhile program is easy. When your cartridge is of no further use, simply follow the instructions detailed for U.S. or Canadian residents. We appreciate your support of The Canon Cartridge Recycling Program. Please Note. Do not send defective cartridges for replacement. Defective cartridges under warranty should be exchanged by an authorized dealer or service facility as provided in the warranty. For Alaska and Hawaii Canon set up alternative mail service with the U.S. Postal Service. Please call 1800OKCANON to receive U.S. Postal Service merchandise return label.On the control panel will light up in the Number of Copies Indicator. Place the material to be copied face down on the platen glass. Adjust the paper guides to fit the size of the copy paper. If the copier is not operated for a period of longer than 5 minutes after copying finishes, the power turns OFF automatically. This is the Auto PowerOff Feature. Do not copy with the platen cover left open, doing so will result in excessive toner consumption. Adjusting the Copy Exposure. When making color copies, lighten the copy exposure manually to avoid the dark shading that appears when color copies are made in the auto exposure mode. Suitable copy stock. This copier can make copies onto copy paper, postcards, transparencies. For best copying results, always use the paper and transparencies recommended by Canon. Copy transparencies one at a time and remove each transparency from the copy tray as it is copied to prevent transparencies from sticking. Do not make copies with paper which has already been printed on using a thermal transfer printer. Making Twosided Copies. This copier can copy on both sides of copy stock.

Place a sheet of standard copy paper underneath the transparency.Making Twocolor Copies. Simply by changing the color of the cartridges, you can make colorful copies. The following procedure describes the process for making a black and blue twocolor copy. REQUESTBefore inserting the cartridges, always rock each one left and right to evenly distribute the toner. Take care to smooth out any curls in the copy paper that may develop while copying and recopying.When Error Indicators Appear. WhenIf paper jams occur often or if up frequently.Clearing Paper Jams When Flashes. When a paper jam occurs, follow the procedure below to locate and remove the jam. Press the top cover release button and open the top cover of the copier. Press the left cover release button.Do not use any cleaning sprays to clean the feeding roller. Wipe clean the roller while turning it in the direction indicated by the arrows.What to Do If You Suspect There is a Malfunction. What to Do If You Suspect There is a Malfunction. Copies are completely black. Copies are too pale. There is condensation in the main unit. The copier is cold.This most often happens when the cartridge toner is low or not

The amount of pages can vary depending upon the amount of ink printed onto each page. 5% page coverage is a standard Canon specification We stand behind our products 100%, as these are not manufactured by Canon. Regular ink dries quickly, which is why cartridges for inkjet printers do not last long. Laser Printers use toner, which is ink in the form of powder.To print out a test page the user must use the computer and enter Printers and Devices. Select Canon PC 170 and using left mouse key click on Properties. Click on Print Test Page and a page with toner levels will be printed shortly. Canon PC 170 alert system will inform the user when toner levels are low when Toner low LED is blinking. At this stage is recommended to replace the toner cartridge. When Toner low LED is on the toner cartridge is empty and need to be replaced. If the user doesn't replace the toner cartridge soon the print quality will decrease. Take out the toner cartridge by sliding it out. Dispose of empty cartridge regarding local regulations. Unpack the new toner cartridge and shake it firmly several times. The user must do this to spread the toner inside the cartridge. Remove the sealing tape from end of the toner cartridge. Insert the toner cartridge back in the printer by holding it down. NOTE The toner cartridge has written instructions. These instructions have to face up when a toner cartridge is installed. Install the cartridge into the printer as far as it can go. Move down the top cover door and press the release button to close it. Slide back the platen to the center. This product comes with a 6 month Warranty against any defects including free replacement. We stand behind our products 100%, as these are not manufactured by Canon. This product comes with a 6 month Warranty against any defects including free replacement. We stand behind our products 100%, as these are not manufactured by Canon. We stand behind our products 100%, as these are not manufactured by Canon.

This portable copy machine weighs a mere 17 pounds, folds right up, and even has an attached carrying handle, making it the perfect solution for those who require copying on the go. Pros Its simplistic design also eliminates the need to make adjustments to elements such as the exposure as the copy machine takes care of these settings automatically. Because the Canon PC170 utilizes a straight through paper path, the small device can print to thicker paper than usual from its main

feed slot. The machine is compatible with paper sizes ranging from 17 lb to 32 lb and, if you're feeling brave enough, you could even try to copy to thicker media as there is little risk when dealing with a straight through print path. The paper feed tray on the Canon PC170 is large enough to hold up to 50 sheets of paper. Considering the incredibly slow copy speed of the device, this amount or storage space is more than enough to suffice. Canon includes a one year warranty with the device, which should not be taken lightly due to the relatively flimsier build of the Canon PC170. The device is of course designed to be carried around and moved often, but that does not mean it is particularly durable in comparison to other stand alone copiers. If the device does end up getting banged up, Canon's support team will provide assistance within a year of purchase. Cons Having a copy machine that you can pretty much take anywhere is a very unique luxury, but the ultra slow copy speed does limit the device's usefulness to some degree. The device's lack of digital copy technology also restricts it in many ways. Using a direct transfer copy method means that no digital version of the input material is stored within the device's memory, and therefore multiple copies from a single source will have to be done manually, one by one. This lengthens the time it takes for multiple copies of the same source considerably because the Canon PC170 has to rescan the source material for every single one.

Because the Canon PC170's copy glass is only big enough to fit a letter sized piece of paper, the unit is incapable of copying to legal sized output. Without digital copy technology, the device is also incapable of hooking up to a host PC to double as a printer or scanner so, unfortunately, this direct transfer unit's only possible source of input is its scan glass.
